Numbers shaded are forecasts.

As the survey methodology for the NVS changed in 2014, domestic tourism data before and after 2014-15 are not strictly comparable. This has particularly impacted on business visitors.

^a Visiting friends and relatives

^b Total excludes nights spent in offshore locations.

^c 'Other nights' includes education, employment and 'nights in transit'

n.a. Data not available due to ABS' change to its historical data series for Overseas Arrivals and Departures

Numbers shaded are forecasts.

As the survey methodology for the NVS changed in 2014, domestic tourism data before and after 2014-15 are not strictly comparable. This has particularly impacted on business visitors.

^a Visiting friends and relatives

^c 'Other nights' includes education, employment and 'nights in transit'

n.a. Data not available due to ABS' change to its historical data series for Overseas Arrivals and Departures

International visitor nights (15 years and over), state summary excluding external regions and other Australia

Numbers shaded are forecasts.

As the survey methodology for the NVS changed in 2014, domestic tourism data before and after 2014-15 are not strictly comparable. This has particularly impacted on business visitors.

^b Visiting friends and relatives

^c 'Other nights' includes education, employment, 'nights in transit' and purpose of visit not asked

^d Total excludes offshore locations.

Numbers shaded are forecasts.

As the survey methodology for the NVS changed in 2014, domestic tourism data before and after 2014-15 are not strictly comparable. This has particularly impacted on business visitors.

^b Visiting friends and relatives

^c 'Other nights' includes education, employment, 'nights in transit' and purpose of visit not asked
