

# Regional Tourism Satellite Account

## East Coast 2015-16

In 2015-16, the tourism industry contributed an estimated \$213.3 million to the East Coast regional economy (60.2% of gross regional product) and directly employed approximately 1,600 people (44.3% of regional employment).

Tourism Satellite Accounts (TSA) evaluates the tourism industry activity and performance within a national accounting framework. The regional TSA measures both the direct and indirect impacts of tourism on the economy and includes metrics such as Gross Value Added (GVA), Gross Regional Product (GRP) and employment. It also provides information about tourism consumption, output, taxation and the composition of the tourism industry and its interaction with other industries.

This East Coast regional profile ranks the economic contribution of tourism to the region both in absolute level terms and as a contribution to the regional economy. These measures are directly comparable to State, National, and indeed, international Tourism Satellite Accounts.

### Key aggregates

In 2015-16, the tourism activity in East Coast generated:

#### Tourism output

- \$241.5 million and \$185.4 million in direct and indirect tourism output, and \$426.9 million in total tourism output.

#### Gross Value Added (GVA)

- \$114.1 million and \$78.4 million in direct and indirect tourism GVA, and \$192.5 million in total tourism GVA.

#### Gross Regional Product (GRP)

- \$123.3 million and \$90.0 million in direct and indirect tourism GRP and \$213.3 million in total tourism GRP; and

#### Employment

- 1,600 jobs for people employed directly by the tourism industry, 1,200 indirect jobs and a total employment impact of 2,900 people.

Table 1.1 Key tourism aggregates (\$ million)

Visitor segment	Consumption	Output	GVA	GRP	Employed ('000)
Day-trippers	162.0	45.0	22.7	23.3	
Intrastate	123.9	57.3	26.3	32.9	
Interstate	192.9	108.7	50.1	45.7	
International	65.4	30.5	14.9	21.4	
<b>Direct</b>	<b>544.2</b>	<b>241.5</b>	<b>114.1</b>	<b>123.3</b>	<b>1.6</b>
<b>Indirect*</b>		<b>185.4</b>	<b>78.4</b>	<b>90.0</b>	<b>1.2</b>
<b>Total impact</b>		<b>426.9</b>	<b>192.5</b>	<b>213.3</b>	<b>2.9</b>
<b>Total economy</b>			<b>331.9</b>	<b>354.4</b>	<b>3.7</b>

\* Regional indirect contribution does not include regional contribution to the rest of Australia. Total indirect contribution in the State Tourism Satellite Account however includes contribution to the rest of Australia.

### Economic importance of tourism in the region

The ratio of East Coast's direct tourism contribution to the total regional economy aggregates provides a point of reference snapshot for the importance of tourism to the region. In 2015-16, it is estimated that tourism directly represented 34.8% of the total East Coast economy (in GRP terms).

East Coast ranked 1<sup>st</sup> overall in the comparative importance of tourism across Tasmania's region and ranked 4<sup>th</sup> in overall industry size; supplying 9.3% of the state-wide direct contribution of tourism to GRP.

# Research factsheet - Value of tourism to East Coast

## Tourism related industry profile

The tourism products that contributed the most to tourism consumption in East Coast in 2015-16 were: (1) \$107.2 million on long distance passenger transportation; (2) \$91.6 million on takeaway and restaurant meals; and (3) \$77.1 million on accommodation services.

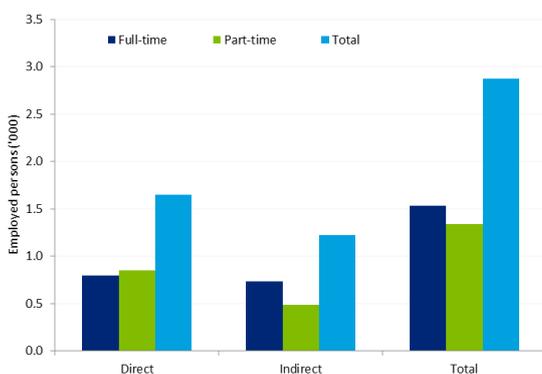

In terms of overall economic contribution, the tourism industries that generated the highest economic benefit to East Coast in 2015-16 were:

- Accommodation with \$38.3 million in direct GVA and \$42.4 million in direct GRP;
- Cafes, restaurants and takeaway food services with \$20.3 million in direct GVA and \$22.4 million in direct GRP.
- Air, water, and other transport with \$17.1 million in direct GVA and \$18.6 million in direct GRP.

## Tourism employment

The TSAs define tourism employment as the number of tourism employed persons. In 2015-16 there were 1,650 persons (made up of 800 full-time and 850 part-time) directly employed in tourism in East Coast.

The tourism related industries that contributed most to regional tourism employment in East Coast in 2015-16 were:

- Cafes, restaurants and takeaway food services (200 full-time and 330 part-time employed persons);
- Accommodation (210 full-time and 240 part-time employed persons); and

- Retail trade (130 full-time and 130 part-time employed persons).

## Regional tourism profile

In 2015-16, visitors to East Coast contributed a total of \$544.2 million in tourism consumption to the regional economy. The majority of visitor consumption in the region was contributed by interstate overnight visitors (\$192.9 million). In relative terms, intrastate overnight visitors to East Coast spend the most per night (\$165.9) on average.

Table 1.2: Tourism activity summary

Visitor segment	Nights ('000)	Nights (%)	Consumption (\$ million)	Consumption (%)	\$ per night
Day-trippers	2,023	42.3	162.0	29.8	80.1
Intrastate	747	15.6	123.9	22.8	165.9
Interstate	1,220	25.5	192.9	35.5	158.1
International	796	16.6	65.4	12.0	82.2

## Methodology

Tourism Tasmania has worked with Deloitte Access Economics to produce consistent and comparable regional Tourism Satellite Account (TSA) estimates of the value of tourism to Tasmania's regions.

Tourism Satellite Accounts are used to estimate the contribution of tourism to a region by combining the contributions of the various goods and services that make up the industry. The regional, state and national estimates are based on an internationally recognised and standardised framework (although regional TSA methodology has been extended to determine the indirect impact of cross region trade flows).

There are a number of steps required to calculate the tourism industry's contribution to East Coast's economy. To start, a regional tourism consumption bundle is derived from TRA visitor survey data and adjusted to remove any price effects that are not directly attributed to the seller of the good or service (e.g. taxes, transport margins, pre-manufactured inputs etc.). The direct and indirect contributions of tourism are estimated by using regional input-output multiplier tables, derived from ABS data.

For consistency and assurance, the regional results are calibrated against the reported 2015-16 state TSA data.

## Tourism Standard Reporting

For consistency in reporting, when referring to the overall size or contribution of the tourism industry in a region, the appropriate measure is GRP. GVA should be used when comparing the tourism industry against another industry within the same region.

## Glossary

**Direct contribution of tourism:** The contribution generated by transactions between the visitor and producer for a good or service that involves a direct physical or economic relationship.

**Indirect contribution of tourism:** The subsequent flow-on effects created by the requirement for inputs from those industries supplying goods and services to visitors. For example, in the case of the hotel industry this might include the fresh produce supplied to a hotel and the electricity used.

**Input-output table:** An input-output table is a means of presenting a detailed analysis of the process of production and the associated use of goods and services and income generated. National input-output tables are produced annually by the Australian Bureau of Statistics.

**Tourism gross regional product:** Tourism GRP is tourism GVA plus net taxes on products that are attributable to the tourism industry. As such direct tourism GRP will generally have a higher value than direct tourism GVA. Direct tourism GRP is a satellite account construct to enable a direct comparison with the most widely recognised national accounting aggregate, gross domestic (or regional) product.

**Tourism gross value added:** Considered the most accurate measure of the contribution of the industry to the economy. It includes the total labour income and capital revenue received by the industry and the net taxes that government received from the production. This measure is directly comparable with the value added of 'conventional' industries such as mining and manufacturing and can also be used for comparisons across countries.

**Tourism output:** The total value of goods and services produced in Australia to satisfy visitor consumption. It is measured in basic prices, so it excludes net taxes on tourism products.
